RE: Letter dated August 5, 2003, from WDOE to Basin Oil Company Inc., Seattle, Washington:
RCRA ID WAD988477501
SECOR Project No.: 01OT.14001.01

Dear Ms. Yelton:

On behalf of Basin Oil Company Inc. (Basin), I have attached the analytical results for the tank bottom sludge sample collected on June 13. Terry Drexler with Basin Oil has discussed scheduling the tank bottom sludge disposal with Lafarge; waste profiling will be completed this month, and disposal will be completed over the following two months (i.e., through September).

Answers to your questions regarding the Stormwater Pollution Prevention Plan (SWPPP) follow.

1. The south end of the facility (new tanks) will not be made operational until the oil/water separator is in compliance.
2. The Best Management Practices described in the SWPPP are in compliance with the WDOE required minimum BMPs as described by WDOE guidance (WQ-R-93-015 page 11-13).
3. Backup for Shelly Hood is Patty Keen; Patty has had some training (hazard communication) and also relies upon Shelly and/or SECOR for support.
4. Appendix A is a handout that Basin uses for orientation and training purposes.

Please call with any questions or concerns.

Very Truly Yours,
SECOR International Incorporated

Don Clabaugh, PE
Principal Engineer
